Jen(nifer) Homme: Aliya Noshahi 12L

Claire De Terre: Neha Khurram 12L

Galactica: Zeina Geha 12S

Martian: Imdad Rahim 11L

Jen Homme: Good evening and thank you for your attention and support to TM1, Tele Mars 1, the last television channel that is being broadcast at the moment. My name is Jen Homme.

Claire de Terre : And I am Claire de Terre

Jen Homme : Here are the headlines of today : Thursday 19 March 3000 !

Claire de Terre: An unprecedented heat wave has invaded the entire world. Temperatures have reached up 50 degrees centigrade and we advise you to follow our safety measures. In other words, DON'T go outside your house for the next 50 years. Good luck ! It'll pass by quickly, don't worry.

Jen Homme: (telephone rings) Yes...Okay. I'll note this down. Ladies and Gentlemen, the last polar bear alive on earth has just informed me that the last block of ice in the North Pole has just melted into soup!

Claire de Terre: Don't forget to put on sunblock, Mr. Teddybear! You'll burn ! Due to this heat wave, the heat sensor on the cryogenic freezer that is preserving Queen Elizabeth II has just gone crazy and she has started to defrost ! Oh, look ! Her toe just moved ! She's truly resistant!

Jen Homme: Long live the queen! The only thing that we can hope is that she doesn't turn into soupy pulp!

Claire de Terre: Yes Elizabeth, take care of yourself!
And now, we have a piece of good news for EVERYONE! From today onwards, no one has to worry about the problems of electricity because there ISN'T any left ! The little bit that is left on this earth is being used tonight for us !

Jen Homme: From this day forth, Pakistan is not the only country living in darkness !

Claire de Terre & Jen Homme: SOLIDARITY !

Claire de Terre : And for the last headline, an incredible discovery has been made far far away from us, where the air is still pure and clean...on the planet MARS !

Jen Homme : Our correspondent Miss Galactica is going to tell us a bit more about this new discovery. Hello, Miss Galactica, you're on live through our satellite.

Galactica : *(speaking without sound)*

Jen Homme : What is she doing ?!

Claire de Terre : Miss Galactica, we can't hear you ! Please turn on your microphone.

Galactica : CLICK ! Oh pardon me, I forgot.

My friends on earth, good evening. Allow me to announce a surprising piece of news that will warm the hearts of all female bachelors out there. (And God knows we are great in number after the nuclear war of 2953)

A group of scientists have just discovered a new specie of martian (shows the martian) with a genome that is compatible with ours. Look how handsome he is ! Two arms, two legs, a nose, two beautiful ears, a wonderful green complexion and four eyes!

Martian : I am beautiful, oh so beautiful, the most beautiful martian there ever was ...

Galactica : Yes, yes we know. Stop exaggerating !

So, if your heart is longing for another, don't hesitate to create your profile in just a few simple clicks on the site « ♥SendMeAKiss.Com ♥ and in a few days, we promise you a romantic date along the 'earth light'

Martian: I am super amazing and wonderful! I do the housework, the ironing, the dishes...I love romantic walks in outer space, eating our local dish, and I can speak 7 languages! I love you, je t'aime, te amo, te quiero, ich liebe dich, mai tanu pyaar karma vaan and in martian: BEM LAB DA! I am so so so so cute and I dance like a god!

Galactica : Yes, okay, don't over-exert your self...we understand !! It's enough ! Are you finished ?

Martian : Yes, I know very well that you're a bit jealous of me but it's important to let them know how amazing I am !

Galactica : Dear viewers, what you should also know is that the martians can read people's minds and have an infallible gift of predicting the future, atleast that's what they claim to be able to do ! Pfffft I AM NOT JEALOUS AT ALL !

Jen Homme : Truly ? Can we try a prediction ?

Galactica : Of course ! Ask your question.

Claire De Terre : Okay, so what is going to happen to us in the next five minutes, Mr. Martian ?

Martian : Uh...Wait...wait ! I have a vision ! The outlook is not very bright ! Okay...uh...I think that your race is not going last much longer ! What I mean is that you guys only have 5 minutes left until the TOTAL destruction of the earth.

Jen Homme : He's funny too ! I've never heard anything so stupid in my life !

Claire de Terre : Oh my God, he was RIGHT ! It's the end of the world !

Jen Homme : But how can this be ?! For the FIRST time I have a date tonight...It's been months that I've been on the waiting list... !
